

November 2017

Dear Parent/Carer

During the course of Year 8 your child will study KS3 Product Design. Half of the year group take product design between September and February and the other half between February and July. In order to make the content of the lessons as engaging as possible we complete a design-and-make project. In Year 8 this involves making a clock.

In order to allow the students to take their practical work home we must ask for a contribution of £2.50 towards the cost of materials. Your child will still be able to complete the project if we do not receive this contribution but they will not be able to take their work home as we may have to recycle the materials.

If your child is studying product design during the first half of the current year please may we ask for your contribution before December; payments can be made using the ParentPay system.

Please do not hesitate to contact me if you have any questions or concerns regarding this.

Yours sincerely

Ben Lowe
Technology Teacher
