Tectonic Hazards

1. What is a natural hazard?	
2. Name 3 different natural hazards	
3. What is hazard risk?	
4. Name the hottest part of the earth	
5. What is the earth's crust broken down into?	
6. Name the 3 different types of plate boundaries	
7. How do the plates move at a constructive plate margin?	
8. What hazards can occur at conservative plate margins?	
9. Which type of crust is denser and therefore sinks at a destructive plate margin?	
10. Why do people live near to volcanoes? (2 reasons)	
11. What is the difference between the focus and the epicentre?	
12. How many people died during the Iceland volcano?	
13. What type of plate boundary does Iceland lie on?	
14. What date did it erupt?	
15. What was one of the main responses that had a global impact?
