

February 2017

Dear Parent/Carer

Your child is studying GCSE resistant materials and, as part of the course they are completing a project which consists of designing and manufacturing a speaker box. This prepares them for the controlled assessment which they will complete next year. In order to allow us to create the practical work for the project we must ask for a contribution towards the costs of materials. This will allow your child to take home their work once it has been manufactured and assessed. We have based the amount we have requested on the materials and components each student has selected to use. If you believe that the cost requested is too high then please return the letter with a note explaining this and we will work with your child to reduce the cost of the materials and components they have used.

If a contribution is not made, the student will not be able to take their work home and may be limited in what they can manufacture, as the school will need to recycle the materials once their project is complete and assessed.

The contribution we request for project is £.....

Please do not hesitate to contact me if you have any questions or concerns regarding this.

Yours sincerely

Ben Lowe
Resistant Materials Teacher

.....
Please return to Student Reception – resistant materials contribution

Name of student

TG

I enclose a contribution of £

Signed
(Parent/Carer)
